PROFESSIONAL SUMMARY

Final-year B.Tech (Electronics and Computer Engineering) student, graduating 2027, with a strong foundation in Data Structures & Algorithms (500+ problems solved) and hands-on experience building full-stack applications using React.js, Firebase, and Electron.js. Seeking a Software Development Engineer / Frontend Developer internship or fresher role to apply strong problem-solving and debugging skills in a production environment.

EDUCATION

Bachelor of Technology (B.Tech) — Electronics and Computer Engineering

PES College of Engineering, Dr. Babasaheb Ambedkar Technological University (DBATU)

Expected Graduation: 2027 | CGPA: 7.45 / 10

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Artificial Intelligence, Software Engineering

PROJECTS

Jarvis AI — AI Desktop Assistant | React.js, Electron.js, JavaScript, AI API Integration, Web Speech APIs

- Built and shipped an AI-powered desktop assistant combining conversational AI, voice interaction, text chat, and desktop application control in a unified React interface.
- Integrated speech recognition and speech synthesis for hands-free interaction, along with AI-generated responses, chat history, auto-scroll, loading states, and quick commands.
- Packaged the application for desktop using Electron.js and implemented commands to launch local applications such as Calculator, Notepad, and VS Code.
- Designed 8+ reusable UI modules (Header, Sidebar, Chat Panel, Input Bar, System Monitor, AI Core, Quick Commands, particle-based visual effects), improving code maintainability.
- Resolved integration issues involving API keys, environment variables, Vite, Node/Electron compatibility, and GitHub secret scanning, strengthening secure configuration practices.

Smart Attendance System — AI & Face Recognition | React.js, Firebase Realtime Database, Face Recognition

- Developed a face-recognition-based attendance system to automate identification and eliminate manual attendance tracking.
- Built an interactive frontend integrated with Firebase Realtime Database for real-time storage and management of attendance records.
- Configured Firebase database permissions and deployment workflows, and deployed the application via Firebase Hosting for live access.

Smart Resume Analyzer | React.js, Vite, JavaScript, PDF Processing

- Built a React-based application to parse and analyze resume content, with reusable components and responsive interactions.
- Implemented PDF-processing functionality and resolved PDF.js worker and library-integration issues within a Vite development environment.

PROBLEM SOLVING & ACHIEVEMENTS

- Solved 500+ Data Structures and Algorithms problems on LeetCode across Easy, Medium, and Hard difficulty levels.
- Strong command of Arrays, Strings, Binary Search, Linked Lists, Stacks, Queues, Trees, BSTs, Heaps, Hashing, Sliding Window, Two Pointers, Recursion, Backtracking, Dynamic Programming, Graphs, and Greedy Algorithms.
- Won a college-level coding competition, demonstrating strong algorithmic problem-solving under time constraints.
- Maintain multiple GitHub repositories documenting consistent practice in DSA, Java, JavaScript, SQL, HTML, and software development.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL, Python

Frontend: HTML, CSS, React.js, Vite

Technologies: Electron.js, Firebase Realtime Database, REST/API Integration, Web Speech APIs

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks

Tools: Git, GitHub, IntelliJ IDEA, VS Code, npm
