

SHAIKH ABDUL RAKHEEB

Full-Stack / Software Developer

Chhatrapati Sambhajnagar (Aurangabad), Maharashtra | +91 7447611320 | rakheebShaikh906@gmail.com

GitHub: <https://github.com/rakheebshaikh906-droid> • LinkedIn: <https://www.linkedin.com/in/rakheeb-shaikh-54830b380/>

LeetCode: <https://leetcode.com/u/rakheebshaikh906/>

PROFESSIONAL SUMMARY

Final-year B.Tech student in Electronics and Computer Engineering (graduating 2027) with a strong foundation in Data Structures & Algorithms (500+ problems solved on LeetCode) and proficiency in Java and JavaScript. Experienced in building responsive frontend applications with React.js, with growing hands-on backend development skills in Node.js, Express.js, and MongoDB, including REST API design and database integration. Focused on writing clean, maintainable code and solving real-world technical problems as a full-stack software developer.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL, Python

Frontend: React.js, HTML, CSS, Vite

Backend: Node.js, Express.js, REST APIs, Middleware, Authentication & Authorization (concepts), CRUD API design

Databases: MongoDB, Firebase Realtime Database

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks

Tools & Technologies: Git, GitHub, Electron.js, VS Code, IntelliJ IDEA, npm

EDUCATION

Bachelor of Technology (B.Tech) — Electronics and Computer Engineering

PES College of Engineering, Dr. Babasaheb Ambedkar Technological University (DBATU)

Expected Graduation: 2027 | CGPA: 7.45 / 10

PROJECTS

Jarvis AI — AI Desktop Assistant | React.js, Electron.js, JavaScript, AI API Integration, Web Speech APIs

GitHub: <https://github.com/rakheebshaikh906-droid/Jarvis-AI->

- **Built** and shipped an AI-powered desktop assistant combining conversational AI, voice interaction, and text chat with desktop application control in a unified React interface.
- **Integrated** speech recognition and speech synthesis for hands-free interaction, along with AI-generated responses, chat history, autoscroll, loading states, and quick commands.
- **Packaged** the application for desktop using Electron.js and implemented commands to launch local applications such as Calculator, Notepad, and VS Code.
- **Designed** 8+ reusable UI modules (Header, Sidebar, Chat Panel, Input Bar, System Monitor, AI Core, Quick Commands, particle-based visual effects), improving code maintainability.
- **Debugged** integration issues involving API keys, environment variables, Vite, and Node/Electron compatibility, and resolved GitHub secret-scanning alerts to strengthen secure configuration practices.

Smart Attendance System — AI & Face Recognition | React.js, Firebase Realtime Database, Face Recognition

Live Demo: <https://smart-attendance-system-29984.web.app/>

- **Developed** a face-recognition-based attendance system to automate identification and eliminate manual attendance tracking.
- **Built** an interactive frontend integrated with Firebase Realtime Database for real-time storage and management of attendance records.
- **Configured** Firebase database permissions and deployment workflows, and deployed the application via Firebase Hosting for live access.

Smart Resume Analyzer | React.js, Vite, JavaScript, PDF Processing

Live Demo: <https://smart-resumeanalyzer.netlify.app/>

- **Built** a React-based application to parse and analyze resume content, with reusable components and responsive interactions.
- **Implemented** PDF-processing functionality and debugged PDF.js worker and library-integration issues within a Vite development environment.

PROBLEM SOLVING & ACHIEVEMENTS

- Solved 500+ Data Structures & Algorithms problems on LeetCode (Easy, Medium, Hard), with strong command of arrays, trees, graphs, dynamic programming, and recursion/backtracking.
- Won a college-level coding competition, demonstrating strong algorithmic problem-solving under time constraints.
- Maintain multiple GitHub repositories documenting consistent practice in DSA, Java, JavaScript, and web development.
